Our App Modernization Services

Our App Modernization services are designed for organizations that need to migrate, modernize, or design new critical business applications. UDT can help identify and address challenges specific to your organization's apps with cost, innovation, and user-experience at the forefront of our approach.

MIGRATE & TRANSFORM

Seamlessly migrate and transform existing apps to a cloud environment where you can automate and modernize processes.

MODERN SDL

Our app modernization architecture is approached with a modern SDL, ensuring a secure migration process.

REFACTOR/ARCHITECT/REBUILD

Modify your existing applications to leverage cloud capabilities through an approach that fits your specific needs and budget. Make more resilient, more responsive, and more cost-effective apps.

Why Choose UDT?

WE HELP YOU DEFINE A MODERNIZATION PATH

Establish and execute a seamless migration path for your organization's apps to a cloud or hybrid environment where you can improve performance and user experience for all stakeholders.

WE HELP YOU DEVELOP YOUR APPS ON A CLOUD PLATFORM

Leverage a cloud platform to develop modern applications designed to take full advantage of cloud capabilities and capacity.
