

STRATEGY & ALIGNMENT

"UDT proved to us that they are not only a technology enabler, but an experienced strategist in helping a company determine their path of transformation. The technical and business acumen they have demonstrated has far exceeded our experience with other organizations, twice their size. UDT is a true strategic partner in crafting a strategy and roadmap for your transformational goals."

Sr. VP of Digital Transformation
National Financial Company

Our Strategy and Alignment Services

Our Strategy and Alignment services help organizations that are lacking a clear vision or a strategy to advance their digital transformation. UDT provides a full assessment and exploration of your current technology and processes, along with an assessment of your business goals and customer expectations to ensure alignment with what you want and need to achieve.

PROGRAM MANAGEMENT

Get a single source of accountability, communication, and escalation from a team that understands your business, budget, and IT objectives. We manage projects through an Agile methodology.

LEAN ACTIVATION

Test and visualize what your digital transformation journey might look like and test your solution before making any major investment.

CLOUD ADOPTION ROADMAP

From assessment to deployment, draw out a seamless path towards adopting the cloud-based on ROI and performance optimization.

Why Choose UDT?

WE HELP YOU TRANSLATE BUSINESS NEEDS INTO AN IT STRATEGY

What you want to achieve defines what you need to achieve it. We help you shape your business goals into an IT strategy that works to fulfill them. Whether your organization is starting the conversation on digital transformation or looking to re-assess its position to further advance its journey, we can handle it.

WE HELP YOU DEFINE THE RIGHT ARCHITECTURE FOR SUCCESS

As a vendor-agnostic firm, we are free from any bias in what we recommend for our clients. We assess and architect the infrastructure, applications, and services that are the best fit for your organization, period. Our multi-vendor approach aims to be cost-effective, scalable, flexible, and backed by data.
