

# SUSTAINABILITY

MANAGING SUSTAINABILITY WITH EASE AND EFFICIENCY

# Make informed IT decisions with better data, a predictable budget, and an optimized end-user experience

Our EndPoint Solutions are designed to make it easier for our clients to run their businesses without having to worry about the time, cost, and effort it takes to manage day-to-day EndPoint Support. Bringing advanced analytics into the mix, we help you take advantage of unrefined data to make informed IT budgetary decisions and understand how to improve productivity and user-satisfaction for all stakeholders.

## OPTIMIZED COSTS

UDT is able to provide an end-to-end solution for lifecycle management delivered as a service with a flexible, scalable, and predictable consumption model. Spend only on what you need to achieve your organization's IT goals.

## MAKE DATA-DRIVEN BUDGETARY DECISIONS

Data doesn't lie. Our EndPoint Solutions help organizations refine their data and put it to use through advanced analytics and BI. With data-based insight, business leaders can make informed and sustainable IT budgetary decisions.

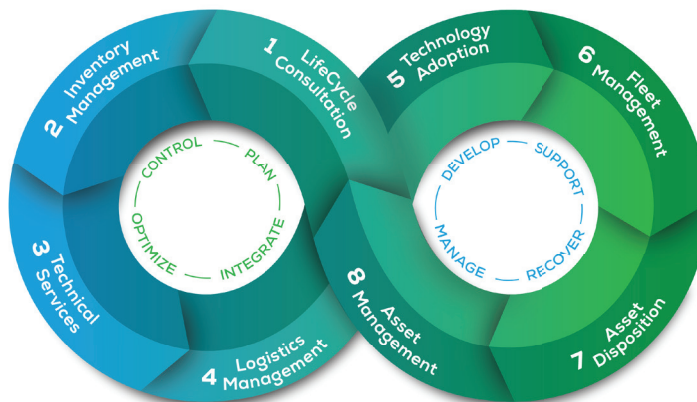

## IMPROVE USER PRODUCTIVITY AND SATISFACTION

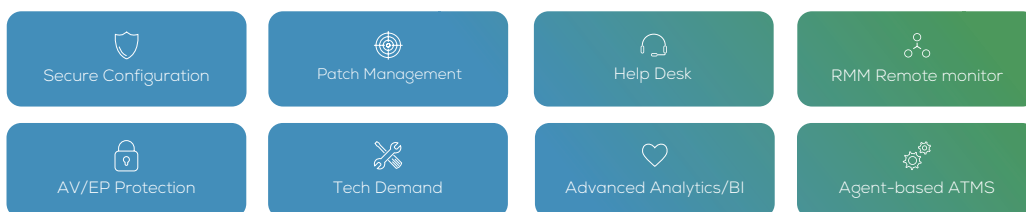

UDT's Endpoint Solutions keep your IT assets updated, supported, and optimized for user-experience. Without having to worry about EndPoint performance, security, and support, end-user satisfaction and productivity will improve across the board.

## How Do We Do It?

We approach these challenges with a lifecycle management services framework aimed at enabling a continuous process that keeps endpoints optimized and protected while ensuring cost-effectiveness, functionality, and seamless adoption of solutions. This Infographic represents the 8-phase process as we've defined it:

The first four phases are a process of planning, controlling, optimizing, and integrating your endpoints, while the second four phases are a process of developing, supporting, recovering, and managing your endpoint devices. We provide additional control, capabilities, and functionalities through our enhanced catalog:

This model is designed to give organizations predictable budgets, optimized processes, broader visibility and accountability for their assets, and continuous protection and compliance adherence.
